OF BUSINESS EFFICIENCY

Wood

Woodgrain: natural style for timeless charm.

About 8000 essences, full-bodied, warm, lively, and refined, created to interpret the trends of the moment.

Research, experimentation, and technology to enhance the wood grain and to guarantee any type of prototyping in a very short time. The sophisticated colour variations obtained through a particular processing creates an intriguing visual effect thanks to the succession of opaque and glossy levels. Unique edges that embody timeless beauty and Italian craftsmanship quality.

SUPER MATT

Modern lifestyle e Soft Touch.

The Super Matt edge, made with an innovative technique, guarantees high surface resistance and easy cleaning.

The natural sensation of contact thanks to the "soft touch" effect, the excellent colour intensity, the low light reflection and the perfect chromatic harmony with the panel surface, give the furniture a touch of elegance made possible by the continuous interaction between Italian craftsmanship and cutting-edge technology.

NEW

DIGITAL

Digital printing: where no one else dares. Customised solutions Always at the forefront and ready to respond to market demands, Italiana Bordi uses the most innovative technology available for the printing and surface enhancement of its extruded products. The digital printing, together with the high quality of the surface and the excellent finishes available, allows to offer a top of the range product, completely customizable with any final finish, from glossy to matt, up to textured.

OUR PRODUCTS

GLOSSY

Unbeatable mirror effect, high refraction.

The Mirror and high gloss edge give the furniture a completely uniform appearance and unparalleled aesthetic perfection, thanks to its unique mirror effect and unprecedented surface flatness. Available in different colours, both in plain and wood colour, the Mirror and high gloss edge offers high impact resistance and good surface hardness, everything you need to have a top kitchen

OUR PRODUCTS

STONE

A material texture created to enhance the kitchen tops and make them a natural monolith.

The “Materic Stone” collection faithfully follows all the distinctive features of stone: hardness, porosity, and strength. The rough effect of the surface stimulates sight and touch, letting that sense of extreme resistance to heat and all types of friction emerge. A bunch of colours, made with the most requested essences of the moment, is always available in stock.

METAL

Highly technological line aimed at responding to new trends in terms of interior design.

The Metal collection includes a series of colours capable of recreating all metallic effects (from chrome to satin aluminium, from copper to antique gold). A special treatment gives these edges a surface resistance to scratches and chemical agents.

Available in various thicknesses and finishes, this product can be delivered with protective film.

THE FINISHES

More than 40 finishing to reproduce tactile and optical veins, wavy and soft, shaped to make the surfaces of the edges look special; we reproduce the best laminates on the market.

Available in different textures, the “Tactile” collection has been conceived to give the surface a new visual code able to revive the classic and historicity of the design or the formal and contemporary rigour of geometric designs and lines.

The intersection of lines and volumes will make the edge attractive thanks to effects generated by the depth and three-dimensionality of the texture.
